

## Sewer Lateral Replacement Memo

Q&D Construction is in the process of replacing private sewer laterals for the City of Reno Chevy Chase and Pembroke Sewer Rehabilitation project, including the replacement of the sewer lateral to your property. To insure each property is repaired to its prior condition, our project team is documenting the improvements at each sewer lateral location prior to, and at the completion of the installation. As part of this documentation, we are presenting each owner with a written statement of the expected impact to their property. We are requesting each property owner to acknowledge the anticipated impact prior to our team installing the water service, and a second acknowledgement at the completion of the installation. Thanks in advance for your patience during this process.
