

## Stormwater Industrial Visual Assessment Report

| General Information                    |  |
|----------------------------------------|--|
| <b>Facility Name and Site ID #</b>     |  |
| <b>Inspector's Name(s)</b>             |  |
| <b>Inspector's Title(s)</b>            |  |
| <b>Inspector's Contact Information</b> |  |
| <b>Inspector's Qualifications</b>      |  |

The Permittee shall perform four (quarterly) visual stormwater assessments each year. Visual assessments shall occur not less than 30 calendar days apart. In areas where freezing conditions exist, the four visual assessments may be distributed during seasons when precipitation runoff occurs.

If it is not possible to collect the sample within the first 30 minutes of discharge, the sample shall be collected as soon as practicable after the first 30 minutes and the Permittee shall document why it was not possible to take samples within the first 30 minutes

|                                                              |                 |
|--------------------------------------------------------------|-----------------|
| Visual Site Inspection Date and Time                         | Sample Location |
| Nature of the discharge (runoff or snowmelt)                 |                 |
| Was sample collected within 30 minutes? If no, describe why. |                 |
| Narrative Results of the observations                        |                 |

|                                                              |                 |
|--------------------------------------------------------------|-----------------|
| Visual Site Inspection Date and Time                         | Sample Location |
