Application Sumittal Date

Description of Work:

AIR QUALITY MANAGEMENT DIVISION

“CONDITIONS OF OPERATION”

- 1) **VISIBLE EMISSION PROHIBITION:** The owner and/or operator of a source engaging in dust generating activities shall not allow visible fugitive dust emissions for a period or periods accumulating more than 5 minutes in any hour. Washoe County District Board of Health Regulations Governing Air Quality Management 040.030(C)(1).
- 2) The owner and/or operator of any unpaved parking lot or staging area shall not allow visible fugitive dust emissions for a period or periods accumulating more than 5 minutes in any hour and shall meet at least one of the standards in 040.030(C)(2)(a).
- 3) The owner and/or operator of any unpaved haul/access road (whether at a work site that is under construction or at a work site that is temporarily or permanently inactive) shall not allow visible fugitive dust emissions for a period or periods accumulating more than 5 minutes in any hour and shall meet at least one of the standards in 040.030(C)(2)(b).
- 4) The owner and/or operator of an open area and vacant lot or any disturbed surface area on which no activity is occurring shall meet at least one of the standards in 040.030(C)(2)(c).
- 5) All open storage piles shall be stabilized by utilizing at least one of the standards described in 040.030(C)(2)(d).
- 6) The owner and/or operator shall erect an informational sign at the main entrance to the project site prior to breaking ground. The sign shall remain in place for the duration of the project. The sign shall meet all the criteria listed in the attached Dust Control Permit Sign Template. 040.030(C)(3)(c)
- 7) The owner and/or operator shall submit an updated Dust Control Permit Application upon change of ownership and/or responsibility for the Dust Control Permit. 040.030(C)(3)(b)(2)
- 8) When hauling bulk materials off-site onto paved public roadways, the owner and/or operator shall prevent spillage or loss of bulk material from holes or other openings in the cargo compartment floor, sides, and/or tailgate using at least one of the following control measures: cover all haul trucks with a tarp or other suitable closure, ensure bulk materials contain enough moisture and/or dust suppressant to prevent fugitive dust emissions during transport, and/or load all haul trucks such that the freeboard is not less than six (6) inches. 040.030(C)(4)(a)
- 9) The owner and/or operator shall install and maintain a suitable trackout control device that controls and prevents trackout and removes particulate matter from tires and the exterior surfaces of haul trucks and/or motor vehicles that traverse such work site at all exits onto a paved public roadway. Clean-up of spillage, carry-out, erosion, and/or trackout shall be performed at least daily or immediately at any time during the day if trackout is creating visible fugitive dust emissions for a period or periods accumulating more than 5 minutes in any hour. 040.030(C)(4)(b)

AIR QUALITY MANAGEMENT DIVISION

10) Cessation of operations is required if dust cannot be controlled due to equipment operations and/or gusty wind conditions. During these conditions, continued dust control measures must be implemented as defined in 040.030(B)(5).

11) The Dust Control Permit shall be kept on the specific job site and made available to the Control Officer immediately upon request. 040.030(E)(2)

12) Any person who conducts dust generating activities shall maintain daily records demonstrating compliance with 040.030(C). Daily records shall be made available to the Control Officer immediately upon request. 040.030(E)(2)

13) Failure to comply with the provisions of an approved Dust Control Permit shall be deemed a violation of District Regulations and this Dust Control Permit. Citations may be issued for each day of violation, in amounts up to \$10,000 per day as stated in 020.040 Civil Fines and Penalties.

Project/Development Information

Detailed description of project/development:

capacity and safety improvements: roadway improvements and widening.

Type of Project (choose one):

☐ Commercial ☒ Road Rehab/Maintenance ☐ Municipal Project ☐ Single Family Residence
☐ Utilities ☐ New Road/Highway ☐ Residential Subdivision/Multi-Family

Will fill material be required? ☒ No ☐ Yes yd³

Amount of material to be excavated (yd³): 200

Will there be an excess of native material as a result of excavation? ☒ No ☐ Yes yd³

Will crushing/screening equipment be used? ☒ No ☐ Yes

If "Yes", Stationary Source Permit to Operate Number for the equipment (AAIRXX-XXXX): N/A

On-site soil type: Oest bouldery sandy loam, Dithod sandy loam, Washoe gravelly sandy loam, existing pavement/concrete

Is there a soil analysis report available? ☐ Yes ☒ No

Method(s) of dust control to be utilized (select all that apply):

☒ Water Truck(s). If yes, specify water source and how many trucks: 1-2 trucks TMWA

☐ Dust Palliative. If yes, attach an SDS and specify the type:

☐ Sprinklers/Water Cannons. If yes, specify the location(s):

☐ Compaction. If yes, what percent?

☐ Enclosure. If yes, specify the type (ex., fences, windbreaks, etc.):

☐ Revegetation. If yes, attach a seeding schedule and specify the type:

☒ Other (specify): pavement/concrete

Will temporary irrigation be supplied? ☐ Yes ☒ No

On-Site Speed Limit: 20

Method(s) to control mud/soil being tracked onto adjacent paved roadways:

Trackout rock/pads where necessary. On call sweeper to clean trackout minimum once daily.

Cleanup of track out shall be performed at least daily or immediately at any time during the day if track out is creating visible fugitive dust emissions for a period or periods accumulating more than (5) minutes in any one hour (DBOH 040.030).

Method(s) (ex., fences, barriers, etc.) to prevent unauthorized traffic on the construction site:

Traffic control (barrels/cones/concrete rail/flaggers) where necessary.

Permanent stabilization methods such as construction of buildings, parking lots, etc., landscaping, revegetation, chemical sealant/palliative, or other approved method(s) of stabilization must occur prior to closure of a Dust Control Permit.

"RESPONSIBILITIES OF APPLICANT DURING CONSTRUCTION"

The Applicant is responsible for:

- a) Compliance with all conditions of the Dust Control Permit
- b) **Dust control 24 hours a day, 7 days a week, including weekends and holidays, from commencement of project to completion.**
- c) If required, obtaining a permit addressing water quality issues related to storm run-off. The Nevada Division of Environmental Protection issues this permit. Contact (775) 687-9418 for further information.
- d) Ensuring a Dust Control Permit is available on site. The site is subject to the right of inspection by an Air Quality Specialist at any time. If the **Specialist** ascertains that a present or potential dust particulate problem exists, specific conditions may apply.
- e) Problem areas or potential problem areas, which may be pointed out by the Air Quality Specialist, must be controlled as soon as possible after being brought to the attention of a responsible individual in the employment of the **Applicant (Owner/Operator)**, Prime Contractor, or Grading/Excavating Contractor.
- f) Notification to the Air Quality Management Division (775-784-7200) when there are transfers or additions of ownership or grading/excavating contractors, from commencement of project to completion.
- g) Submittal and approval of a new Dust Control Permit, **prior to the expiration date**, if the project is not complete, and the remaining land disturbance is one acre or greater. The Dust Control Permit is valid for eighteen (18) months from the date the Permit is issued.

"RESPONSIBILITIES OF APPLICANT UPON COMPLETION OF CONSTRUCTION"

- a) Stabilization of the area is required once "final grade" is complete, by construction/landscaping, revegetation, chemical sealant, or other approved method(s) of dust suppression.
- b) **Submit a Completion of Project form (attached) to the AQMD, 1001 East Ninth St B171, Reno NV 89512 or by emailing the form to AQMDDust@nnph.org.**

DUST CONTROL PERMIT SIGN REQUIREMENTS

The owner and/or operator shall erect an informational sign near the main entrance to the project site where it can be easily observed by the public and the AQMD. The sign shall be installed prior to breaking ground and shall remain in place for the duration of the project. The sign shall have a minimum dimension of 4 feet by 4 feet and sign lettering shall be in a contrasting color to the background (see example below for alpha and numeric text dimension requirements). The sign shall be constructed with materials capable of withstanding wind and harsh environments.

The sign shall have the following information:

- Project Name
- Permittee Name
- Dust Control Permit Number
- Project Acreage
- Expiration Date
- Phone Number of Person Responsible for Dust Control Matters
- AQMD Phone Number

Signage Example

1 ½" Title Case Lettering ¹	Project Name: (Project Name)	3 ½" Title Case Bold Lettering ¹
